curing after Nature's on method, by Nature's own method, the Gastric Juien.

Half a teaspoonfull of this Fluid, infased in water, will digest or dissolve Five Pounds or Roast BELLY IN ABOUT TWO HOURS, out of the stomach.
Scientific Evidence!

Baron Luxue, in his celebrated work on Anima hemistry, says: "An artificial Digestive Pluid, analagous to the Gastrie Juice, may be readily prepared from the mucuous membrane of the sto much of the calf, in which various articles of food, as meat and eges, will be so softened, changed and digested, just in the same manner as they would be

n the human stonnes."
Dr Perries, in his famous treatise on "Food and Diet," published by Fowlers & Wells, New York, page 3 i, states the same great fact, and describes the method of preparation. There are few higher authorities than Dr. Pereira.

Dr Count, in his valuable writings on the Physdogy of Digestion, observes that "a dimunition of the due quantity of the Gastrie Juice is a prominent and all prevailing cause of Dyspepsia; and he states that "a distinguished professor of medicine in London, who was severely afflicted with this complaint, finding everything else to fail had recourse to the Gastrie Juice, obtained from the stomach of living animals, which proved completcly successful."

Di Gaanam, author of the famous works on "Vegetable Diet," says: "It is a remarkable fact in physiology that the stomachs in animals, macerated in water, impart to the fluid the property of dissolving various articles of food, and of effecting a kind of artificial digestion of them in no wise different from the natural digestive process." Dr Streen's great week, de hemistry of Man,'

Lea & Bianchard, Phila, 1846, pp 321-2) says:-The discovery of PEPSIN forms a new era in the chemical history of Digestion. Prem recent ex periments we know that food is dissolved as rapidy in an an artificial digestive fluid, prepared from epsin, as it is in the natural Gastrie Juice itself." Professor Duxonson, of the Jefferson College Phita lelphia, in his great work on Human Physi ology, devotes more than fifty pages to an examination of this subject. His experiments with Dr. Beautient, on the Gastrie Juice, obtained from the living human stomach and from unimals, are well known. "In all cases," he mays, "digestion occurred as perfectly in the artificial as in the naturat digestions."
